B5.9 Upper Engine Gasket Sets;

M-3977063 head gasket is now available from Interstate-McBee. This gasket incorporates the latest upgrades which allow for improved sealing capabilities and replaces all previous head gasket part numbers for the ISB and QSB5.9 engines. This new style gasket (**M-3977063**) is identified by the addition of a third metal compression limiter at the corner on the exhaust manifold side of the gasket. This gasket is currently available in kits listed below.

M-3977063	Gasket, Cylinder Head
M-4090035	Gasket Set, Upper
M-4090037	Gasket Set, Upper

Caterpillar G3400 Intake and Exhaust valves;

Intake and Exhaust valves are now available for the G3408 / G3412 engine applications utilizing the new style tall cylinder head groups. The new “taller” cylinder head groups are .51 inch (13 mm) taller than the previous cylinder heads used in these applications.

M-2120932	Intake Valve
M-2120933	Exhaust Valve

The new **M-2120932** and **M-2120933** valves must be used with the following valve guides. These guides are also available from Interstate McBee.

M-2137536	Valve Guide, Intake
M-2137537	Valve Guide, Exhaust
